NO. OF ENCLS. 1 sketch (LISTED BELOW)

DATE OF SUPPLEMENT TO

25X1X

- L As shown on the attached sketch, a wireless station is located about two kilometers west of Grunau railway station.
- 2. The station comprises:
  - Two D/F sets, believed to be of "Adcock" type.
  - Twenty-two masts, in three separate groups, the masts in each group being linked up by serials between the tops.
  - c. Two heavy steel masts, about 20 meters high, of the type which generally carry grid aerials. These masts were erected in May 1948 and are still being worked on. The aerials are not yet mounted on the tops.
- 3. About ten soldiers with blue evaulettes were seen inside the compound, which also contains three huts.
